

KAVERI RAUT (Jr. Fullstack Juniour Developer)

+91 7220813813 | Aurangabad, India | [Mail](#) | [Github](#) | [LinkdIN](#)

PROFESSIONAL SUMMARY

Highly skilled and detail-oriented Full Stack Developer in designing, developing, and deploying scalable web applications. Proficient in modern technologies, including React.js, Next.js, Node.js, PostgreSQL, and Prisma, with a strong focus on delivering seamless user experiences and robust backend solutions. Adept at transforming business requirements into innovative, efficient, and maintainable solutions.

INTERNSHIP

Jr. FullStack Developer | Inphynous Technology Solutions Pvt Ltd

Nov 2024 - Current

- Currently working as a Full Stack Developer at **Inphynous Technology**, contributing to the development of an advanced project management platform.
- Responsible for building and maintaining a scalable admin panel using Next.js, Tailwind CSS, and TypeScript on the frontend. On the backend, manage API development, database design, and server-side logic to ensure efficient and secure data handling.
- Integrated AI-powered Gemini AI chat to enhance task collaboration and communication.
- Collaborate closely with cross-functional teams to deliver robust, user-centric solutions with a focus on performance optimization and scalable architecture.

Automation (Intern) | Crown Software, Junagadh

Apr 2024 – Sep 2024

Completed an extensive internship focused on automation testing for web and mobile applications using **Selenium** and **Appium**. Developed **end-to-end test scripts** in Python to automate test case execution, validate functionalities, and ensure software quality.

- **Test Case Automation:** Successfully wrote and executed comprehensive test cases for both web and mobile applications using Selenium for web and Appium for mobile environments.
- **Data-Driven Testing:** Created and managed test scenarios stored in structured Excel (X) files, which served as input for automated Python scripts.
- **Automation Script Development:** Designed Python-based automation scripts that dynamically read test cases from Excel files and executed them, improving efficiency and accuracy.
- **Test Reporting:** Developed an automated reporting mechanism where test results were generated in an HTML page with a clear, color-coded system—green for successful tests and red for failed tests, along with descriptive test case titles for easy reference.
- **Efficiency & Accuracy:** Reduced manual testing efforts and enhanced the reliability of test executions by leveraging automation for regression and functional testing.

This internship honed my skills in automation frameworks, scripting, and result-driven reporting while reinforcing best practices for scalable and maintainable test automation solutions.

Frontend (Intern) | XScientist Tech LLP

Sept 2023 - Mar 2024

Successfully completed a frontend development internship, contributing to multiple projects with a strong focus on responsive design and user experience. Collaborated closely with designers and senior developers to deliver visually appealing and functional applications.

- **E-commerce Website Development:** Built a fully responsive and interactive e-commerce website using React and Tailwind CSS. Developed dynamic components, including product cards, filters, and a seamless user interface, ensuring optimal performance across devices.
- **Figma Collaboration:** Worked on design implementation from Figma prototypes, translating UI/UX mockups into pixel-perfect and responsive web components.
- **Team Collaboration:** Partnered with a cross-functional team of developers and designers to meet project deadlines, conduct code reviews, and troubleshoot issues for smooth project delivery.
- **Game Design Contribution:** Collaborated with a senior developer on a Figma-based design project for a Bingo game, focusing on interface layout and improving user interaction patterns.
- **Responsive Design:** Ensured cross-device compatibility and adherence to best practices for accessibility and performance optimization.

This internship provided valuable experience in frontend development, design collaboration, and the ability to deliver high-quality user interfaces while working in an agile and fast-paced development environment.

SKILLS & OTHERS

🔗 Programming Languages	SQL, Python, Java, Typescript.
🔗 AI	OpenAI, Gemini AI.
🔗 Frontend Development	HTML, CSS, Javascript, Tailwind CSS, Bootstrap, React.js, Nextjs, Three.js, Material UI, Tanstack Query, React Counter, Redux, Shadcn/UI
🔗 Backend Development	Nodejs, Express.js, Context, RestApi, Serverless, OAuth, Monolith, Microservice, Restfull design, MVC, MonoRepo.
🔗 Database Development	SQL, Oracle, MongoDB, Postgres, Firebase, Supabase
🔗 Other Skills	Communication, Leadership, Management, Team Work.
🔗 Tools & Technologies	Git & GitHub, Figma, Photoshop, Canva, Visual studio, Jupiter Notebook, Postman, PgAdmin.

PERSONAL PROJECT

ScrapFlow | scrap-flow.vercel.app

- Scrapify is a dynamic web scraping platform that streamlines data extraction through customizable workflows and **AI-driven** insights.
- Integrated with powerful tools like **OpenAI** and **Puppeteer**, it enables intelligent data parsing and **automation** for complex scraping tasks.

- Operating on a **credit-based system**, Scrapify offers scalable solutions where users can efficiently manage and execute scraping projects.
- Designed for developers and businesses alike, Scrapify simplifies web **data extraction** with seamless **automation** and cutting-edge **AI integration**.

Drake Studio (Fashion Studio Website) | drake-studio.vercel.app

- Developed a dynamic fashion studio website with advanced animations and smooth scrolling effects using **React**.
- Implemented interactive scroll animations with **GSAP** and enhanced user engagement through page load and state change animations using Framer Motion.
- Leveraged **Locomotive Scroll** for custom scrolling experiences and **Styled Components** for scalable, component-level styling.
- This project demonstrates expertise in creating visually appealing and highly interactive web applications with modern libraries and animation techniques.

Player/Motion (Headphones & Audio Website) | headphones-webpage.vercel.app

- Designed and developed a sleek, interactive headphones and audio product website using React, Tailwind CSS, and Framer Motion.
- Integrated smooth animations for page transitions, hover effects, and interactive elements to create an engaging user experience.
- Utilized Tailwind CSS for responsive and modern UI design, ensuring optimal functionality across all devices.
- Enhanced the user interface with Framer Motion for dynamic audio player interactions and immersive product showcases, delivering a captivating and visually polished web experience.

EDUCATION

- **Bachelor of Technology**
CSMSS Chh. Shahu College of Engineering, Aurangabad, Maharashtra, India.

Feb 2020 – June 2024
